SKILLS

NODE JS, SQL, PYTHON, LINUX, AWS, DOCKER

EDUCATION

High School Mar Basil H. S. S Kothamangalam (2020-22)

Bachelor's Manipal University Jaipur (2023 - Expected 2026, Part-time)

EXPERIENCE

WEB DEVELOPER

DJANGO, POSTGRESQL, LINUX

Freelance

2017 - 21

- Designed and built custom web applications using React, Django, and modern UI tools.
- Delivered over 10 client projects on time, handling everything from design to deployment.
- Deployed and managed apps on VPS servers (Ubuntu/Linux) using SSH and Nginx.

JUNIOR DEVELOPER

REMIX JS, LIQUID, SHOPIFY CLI

Final Apps

2022 - 2023

- Developed and shipped multiple Shopify apps under tight deadlines.
- Fixed high-priority bugs to improve customer experience and retention.
- Contributed to feature development across existing products and internal tools.

SENIOR DEVELOPER

N8N, GIT, BASH

Final Apps

2023 - 2024

- Built automation tools that reduced development costs by ~30%.
- Refactored legacy codebases for better scalability and maintainability.
- Mentored junior developers and reviewed code to improve team standards.

TECHNICAL LEAD

CI/CD, AWS, DOCKER

Final Apps

2024 - present

- Lead a small developer team, mentoring new hires and improving communication and delivery speed.
- Designed and maintained server architecture and CI/CD pipelines on Linux and Docker.
- Collaborated with clients to define technical roadmaps and deliver scalable backend systems.

PROJECTS

WEB APP DEVELOPMENT

DJANGO, HTML, CSS

Farmfills

2019 - 21

- Designed frontend as per requirements using Adobe Photoshop and developed using HTML and CSS.
- Developed backend using Django and implemented the business logic with the best performance
- Hosted the app in Digital Ocean using Ubuntu operating system and managed it using SSH.

WEBSITE DEVELOPMENT

REACT JS, FIREBASE

Amzsys technology solution PVT LTD

2020 - 21

- Designed the landing page using modern design trends and following the preferred color combination.
- Developed a content management system for the blog using Firebase and integrated with the frontend.
- Built the landing page animations using React JS and optimized the website to improve performance.

DATABASE MIGRATION

MYSQL, POSTGRESQL, MS EXCEL

FarmFills

2019 - 21

- Exported the data from an old server which was managed by other developers, as spreadsheet files.
- Restructured the data using Google sheets and restored to PostgreSQL database.
- Connected the database with the backend framework and successfully ran the app without downtime.

ONLINE EBOOK STORE AND READER

DJANGO, CSS, HTML

Publiso

2021

- Implemented user login for personalized experience such as adding books to the library and following authors.
- Developed an admin panel with Django to upload books as pdf to the store, its authors details and images.
- Built a reading API which returns each page of the book as per requests and prevents content getting stolen.

SOCIAL MEDIA PLATFORM FOR MEMES

DJANGO, CSS, HTML

Chali

2021

- Created a minimal and interactive UI for a better user experience.
- Optimized infinite scrolling and big data computing with database structuring and querying.
- Built a notification system for every action of a user and cleaned the data after n hours.
